

# Transforming tradition: How Audeo Groupe modernized insurance operations with Mendix

## THE CHALLENGE

Audeo's focus on building client-specific IT tools put a resource constraint on its initiatives. Alongside the development team's dedication in a business information system for a subsidiary, the team didn't have enough time to address the **company's internal needs**, plus their digitalization projects. They needed to further **optimize internal processes and improve user experiences**.

## About Audeo Groupe

With over 120 years of history, 500 employees, and give companies, Audeo provides insurance services, from advising small-to-medium enterprises to managing third-party contracts.

### 4 MONTHS

to deliver the JuriDesk application

Considering our complex business requirements, **Mendix** has proven instrumental in meeting many of our needs effectively."

Head of Digitalization  
at Audeo Groupe

## THE SOLUTION

Starting in 2022, Audeo chose **Mendix** for their development efforts, which matched their legal team's desire for a contract management solutions that was digitized, traceable, and efficient. The apps developed with Mendix provided Audeo with:

complete traceability for each contract approval

private chat to facilitate stakeholder collaboration

tracking fraud cases detected by the internal control service

## KEY POINTS

1

### Overcoming resource constraints

The rapid development of applications like JuriDesk in just four months allowed for a streamlined contract management process and seamless integration with existing systems like SharePoint and SSO (Single Sign-On), which ensured security and efficiency.

2

### Enhanced collaboration

Mendix fostered cross-functional collaboration at Audeo Groupe by enabling IT, business stakeholders, and UX designers to work together in real-time, ensuring both technical and business needs were met.
